

Compass

Compass offers you complete design flexibility. There are a wide range of panel heights, shapes and sizes. Posts come in a variety of shapes and designs so they can provide unobtrusive support or become an integral part of the sign.

Host of Features

Compass offers double post signs, fingerpost units and wall signs. The range of features includes in-built lighting and panel and posts that can support panels up to six metres in height. In situations where information is updated frequently, our Paperflex system lets you print your own paper signs and display them behind a protective acrylic cover.

Designed to Endure

Compass is designed to withstand all weather conditions, accidental damage and even vandalism. The panels are made entirely from aluminium and then oven hardened to your colour specifications to create a superb lasting finish.

Any Environment

Compass gives designers the freedom to create any style of sign they want, from bold and innovative to simple and elegant. This flexibility means that Compass signs can be used in any environment, in parks and gardens or even alongside the most modern architecture.
