

Era

Era is a price attractive award winning product with print-on-panel technology.

Re-launch of award winning product

We are now re-launching our very first sign system formerly known as Interior 10. It was originally launched in 1974. We launch it in an updated design and we call it Era.

The original product won the Danish ID Design award for outstanding design and was our best selling product until the introduction of Pacific Interior.

With Modulex Era we may print the graphic directly onto the panel, which gives both an outstanding durability and endless freedom of design.

Today, it will be our price attractive alternative although still at our usual product quality level.
